Silikal in the meat processing industry

Clean, extremely durable, seamless and quick to install—Silikal reactive resins are the perfect basis in all utility areas at butchers, slaughterhouses and meat processing facilities everywhere.

Clean, quick, safe and fine-l

They go down overnight: hygienic flo

Skillfully applied by qualified installers and the new floor is fully cured and ready for action within one hour. A perfect way to keep your operation running wide open.

The word hygiene is capitalised in the meat processing industry and is a topic that certainly has to start from the bottom up, which means: the floor. Reactive resin flooring products from Silikal offer the best basis for the flawless handling of sensitive foodstuffs, especially meat, and for a safe and rationalised daily routine at meat processing and packing plants.

Seamless and non-porous, Silikal floors can be cleaned quickly, but more importantly thoroughly, a special advantage for meat processing facilities where impeccable hygiene is a must. It is also possible to make the floors into a basin to catch any and all wastes and residues. The same is true for anti-skid surfaces which can be delivered to customer specifications.

ooking ... Floors from Silikal!

sors for the meat processing industry

Aggressive materials, for example salts, acids, fats, lye and cleaning agents cannot make a dent in durable reactive resin floors. The same can be said for the extreme mechanical loads one often finds in meat plants.

It is virtually no problem to fulfil your wish for a new floor. Silikal reactive resins go down quick and easy

without any downtimes for your factory and at temperatures down to -25°C ! After a drying time of only one to two hours, the floor is able to bear its specified load. And by the way, the same also holds true for later changes, renovations or repairs to the surface, for example when you want to change the use or design of the space.

Your call—Silikal! An overview of the advantages.

Hygienic and clean ...

- Monolithic, seamless surface
- Resistant to alkalis, acids, greases, oils, salts and other aggressive media
- Easy to take care of

Safe ...

- Anti-skid surface grades
- Wear and tear resistant
- Can withstand hot and cold

Quick and beautiful ...

- Extremely short curing times; no interruptions in business when renovations are made!
- Easy to apply, even at temperatures below zero
- Selection of appealing colours, e. g. with coloured quartz sand or flakes mixtures as standard
