## **Quickly cleaned, extremely durable: Silikal-floorings for milking parlours**

Quickly coated, easy to clean, extremely durable. Silikal-coatings based on reactive resins prove a long lasting floor for milking parlours. They are resistant against lactic acid and provide an anti-skid surface for people and animals.

# Clean floor for milking ca

*Skillfully applied by qualified installers and the new floor is fully cured and ready for action within one hour. A perfect way to keep your operation running wide open.*

The 36 milking stations of the ultra-modern milking carousel at the **Milking Plant J. Moonen in Hilvaren beek/Netherlands** (total approx. 72 sq m) were covered with a 6 mm thick, and with added coloured quartz crystals, grass green coating. The surrounding floor space, the milk tank, the office, the computer area as well

as the neighbouring wall areas (approx. 500 sq m) received a 3 mm thick light grey Silikal coating.

The floor of the new **Milking plant J. Vermeer in Best/ Netherlands** also has an easy care foundation made of Silikal reactive resins. The 8 sq m area for the milking robot

was also coated in green and particularly thick (6 mm). 130 sq m surrounding floor space, milk tank, office, computer area and hallway were also designed with added Silikal colour quartz crystals in beige. Anti-skid and resistant against many acids and chemical cleaning solutions the new floor covering provides safety in day-

to-day business. In addition about 450 sq m coated wall surface also play an important role in regards to hygiene in the milk processing facility. And with a smooth coating the almost 50 sq m feeding area in front of the cowhouse now has an easy to clean floor.

The new floor surfaces for both projects were realized in very short times:

The applied coating requires merely about an hour until it is completely cured and with that also fully loadable again.

**Your call—Silikal!  
An overview of the advantages.**

**Hygienic and clean ...**
