Silikal flooring for kitchen
Crematorium in Wilrijk/Belgium

Expect more from your floor.

Slip-resistant and attractive surfaces with flakes

A low-maintenance and hard-wearing reactive resin coating was applied on the floor of the kitchen in the visitors area of the "Prometheus Centrum" crematorium in Wilrijk (near Antwerp in Belgium).

Coving prevents dirt from gathering in corners of the kitchen and makes it easier to clean. As part of the coating work, drains and channels were integrated precisely into and level with the floor.

The red methylmethacrylate (MMA) resin floor covers the entire kitchen area of 120 square metres and was adapted to suit the various requirements. For instance, the surface is more resistant to high temperatures in front of the cooker. And a dressing of grey flakes in some parts gives the floor a slip-resistant and highly aesthetic look.
