Silikal MMA

... for a secure stand

Skillfully applied by qualified installers and the new floor is fully cured and ready for action within one hour. A perfect way to keep your operation running wide open.

Every year about 180 canines are trained at the customs dog school in Bleckede in the Lüneburger Heide. There are six new buildings with a total of 72 kennels, all of them equipped with Silikal MMA flooring.

The dogs have a sturdy standing area and the surfaces can be easily, quickly and thoroughly cleaned.

The future super-noses of the customs dog school in

-floorings ...

easy and fast clean-ups

Bleckede – one of two schools in Germany – should feel comfortable there: a lot was taken into consideration when equipping the new training center. For example the fact that dogs don't like to walk on smooth surfaces. That is

why the kennels received a non-slip Silikal flooring with added colour quartzes.

The reactive resin coating makes cleaning the dog kennels a quick, problem-free task.

Dirt and feces can be removed without leaving a residue. Even regularly treating the surface with steam blasters is not a problem.

Your call—Silikal!
An overview of the advantages.
